Work Experience

🏢 Software Engineer • Hyperthink System. (Dec 2022 - Present)

- Developed frontend web applications with a focus on responsive design and user experience.
- Designed user interfaces and integrated them with backend APIs.
- Managed code merging and oversaw deployment processes.
- Presented demos to clients, gathered feedback, and actively participated in project discussions.
- Stepped in as Frontend Team Lead during the absence of the Team Lead, guiding the team to ensure project success.

Key Projects:

- **DIC (Digital Incubation Center):** Designed and developed a web application for the Qatar Ministry, enabling startups to register for funding and allowing investors to sign up and provide funding to startups that meet their criteria.
- **Ticket Monitoring:** Developed a ticket tracking system for logging issues from customers or testing teams. Managed ticket assignment, resolution, and automatic email notifications.
- **Tree Monitoring:** Developed the UI for a Qatar Ministry project, enabling the tracking of tree plantations across various sites.

🏢 Frontend Developer • Rejolut Technology Pvt Ltd. (Mumbai) (Aug 2021 - Dec 2022)

- Developed frontend web applications with a focus on responsive design and user experience.
- Designed user interfaces and integrated them with backend APIs.
- Managed code merging and deployment processes.
- Presented demos to clients, gathered feedback, and refined project deliverables.

Key Projects:

- **NGCX (Nigerian Government Gas Exchange):** Developed a website for Nigerian users to register and purchase gases such as CNG, PNG, LPG, and PPG, similar to the Indian Gas Exchange (IGX).
- **Malaysian Airlines:** Managed data for previous, current, and forecasted years for multiple entities, including sister companies MH Commercial, MasWings, MH Firefly, MasCargo, and Jazeera Airlines (under Malaysian Airlines).
